

FORGED CLUTCH BASKETS, INNER HUBS AND PRESSURE PLATES

- Each clutch basket, inner hub, and pressure plate starts as a dedicated precision forging
- Raw forgings are then precision machined to very close tolerances
- Relief cuts reduce rotational mass, increasing acceleration
- Large oiling holes increase lubrication and reduce heat
- Finished parts are hard-coat anodized for superb wear resistance
- Teflon coating creates near-frictionless surface for clutch plates
- LIFETIME WARRANTY - all Wiseco Clutch Baskets, Inner Hubs, and Pressure Plates
Warranty covers breakage and notching for original purchaser with proof of purchase

CLUTCHES FOR STREET MOTORCYCLES

"SRK" SERIES FULL KITS STREET / SPORT / RACE

Kit includes friction plates, steel
springs, and a complete clutch
rebuild kit.

"SR" SERIES KITS STREET / SPORT / RACE

Complete drive plate SR kit is
ideal for heavy sport bikes,
fast riders and a combination of
the SR key higher bearing
has more aggressive clutch
take up than the CK cork series.

Note: Do not use fully synthetic oil

"CK" FRICTION PLATE KITS

Kit includes cork plates and engine-
oil.

"CKF" CARBON FIBER FRICTION PLATE KITS

Carbon Fiber replacement
friction kits are great for the
highly aggressive rider.

Autarkies. Range tools 95%
and ATVs and allow positive l
Of standard on all pages in the
model

Note: Do not use fully synthetic oil

CLUTCHES FOR ATV'S, OFFROAD & STREET MOTORCYCLES

"CS" CLUTCH SPRING SETS

Always fit new springs which get tired
after miles of heat and use.

EBC standard is a 90% oil spring
sets. As stated in general fitting/safety
instructions, advise customers that
lever will feel slightly "heavier" when
operating in the field.

Note: Do not use fully synthetic oil

CLUTCH REMOVAL TOOLS

CLUTCHES FOR ATV's & OFFROAD MOTORCYCLES

"DR" COMPLETE KITS

Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.

Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevents premature driven plate wear, oil muddying and loss of stack height

EBC DR kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging". *Note: Do not use fully synthetic oil.*

"DRCF" CARBON FIBER KITS

The ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fiber lined clutch plates plus a full set of steel plates and heavy duty springs. These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

"CK" FRICTION PLATE KITS

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sells complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminum separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the engine, change the oil and rebuild the clutch with a complete DR kit which includes STEEL separator plates that not only prevents wear but increases flywheel effect of the engine and improve performance.

"CKF" CARBON FIBER FRICTION PLATE KITS

Carbon Fiber replacement friction clutch plate kit.

These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

EBC Clutches are TOTALLY ASBESTOS-FREE

Clutches are made from a cork based "anti-swell" facing impregnated with aluminum particles to reduce wear & heat fade

Kits are sold in pre-measured engine sets and should always be replaced in engine sets

USE ONLY MANUFACTURER'S drive case oils and avoid lead or other anti-friction additives

SOAK PLATES in drive case oil before installing

EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip

Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

CAUTION – SAFETY WARNINGS FOR CONSUMERS

Never start a motorcycle while in gear with clutch depressed

Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed

Hold front brake lever on when selecting gears from standstill

Never engage gears from a standstill with engine revs above 1500 rpm

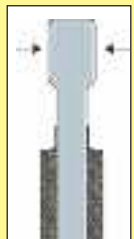

When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle

We do not recommend the use of fully synthetic oils

Check oil levels regularly

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.
