

## PROX PISTON KITS

- Precision machined on the latest, state of the art CNC equipment
- Uses the same low-expansion, low-friction piston alloy as used for all major Japanese engine manufacturers
- Pistons for plated cylinders come in standard size, as well as in A, B, C, D+ oversizes
- Pistons for sleeved cylinders are available in standard size and a wide range of oversizes. The availability of oversizes up to 2mm significantly helps to increase the lifespan of a cylinder by offering more re-boring possibilities
- All PROX piston kits are supplied complete with piston rings, wrist pin and circlips, ready to install

## Racer's Choice Piston Series

In the past, our Racer's Choice parts were reserved for top race teams and experienced engine builders only. Now you can own the same race technology.

These high-tech, feature rich piston designs offer maximum compression ratios, Armor-Glide® skirt coating, ultra stiff strutted and boxed forging designs and titanium nitride coated rings.

The RC series pistons also feature ArmorPlating® and DLC coated piston pins. This proprietary ArmorPlating improves ring seal, eliminates micro-welding and improves the pistons ability to defend against harmful detonation.

These pistons are available for popular 250F and 450F Motocross bikes as well as 450cc ATV models, referenced throughout the application listing with part numbers beginning with: WPRC.

Wiseco ArmorGlide® skirt coating is the result of testing, development and benchmarking through our rigorous in-house dyno program.

The outcome is the ultimate in skirt coating toughness, lubrication and bond technology working together to minimize friction, maximize horsepower and provide improved wear resistance.

Not only is ArmorGlide® a high-tech lubricant that reduces friction, but it also allows the piston be fitted tighter within the bore that a non-coated piston.

The benefit of reducing piston-to-wall clearance is better ring seal and reduced noise from piston rock.

Wiseco supplies a broad selection of complete top end kits in its product lineup. These kits come complete with a hi-performance forged piston, rings, clips, pins and top end gasket kit plus (needle bearing for 2 stroke applications).

These kits are listed on the following application pages.

- APPAREL
- FUEL/AIR
- ELECTRIC
- TOOLS
- SECURITY
- LUGGAGE
- H<sub>2</sub>O
- ACCESS
- CHINESE PARTS
- CONTROL
- CHEMICAL
- CLUTCH
- PISTONS**

(4-cycle use only)  
② = Tool Steel piston pin

## PISTON CIRCLIPS

Two are furnished with every piston. Additional circlips are available and are sold per set. When ordering replacement circlips, be sure to replace with the same type. CS and CW style circlips are not interchangeable.

## WISECO STREET BIKE TOP END PISTON KITS

- Most kits include: pistons, rings, pins, clips and gaskets, see Wiseco's catalog or web site for exceptions
- Premium pump fuel required for high compression ratios up to 13.5:1
- Increased octane (race fuel) required for compression ratios over 13.5:1
- Most kits require cylinder/engine modifications, see Wiseco's web site or catalog for additional information

## NAMURA® TOP-END AND PISTON KITS

- Namura® pistons are made to exact OEM specifications and are direct replacements for OEM pistons with no modifications or dimensional adjustments needed
- Namura® pistons have MOS2 (MOLYBDENUM/TEFLON) skirt coatings, high-silicon aluminum & anodized domes
- A, B & C pistons are available to help extend the life of expensive Nikasil, SCEM, Boron Composite & Ceramic Cylinders
- Namura® rings are made by Riken the world's largest OEM manufacturer & are the same OEM rings used on more motorcycles and ATV's than any other
- Piston kits come with the piston individually wrapped, a set of OEM quality rings packed in their own box, wrist pin(s), and circlips
- Namura® top-end gasket sets include head, base & other necessary gaskets, o-rings and valve guide seals, as required, to complete a top-end rebuild

## NAMURA® HYPERDRYVE PISTONS

- Namura®'s new Hyperdryve line of 4 stroke pistons is composed of a space-age hypereutectic aluminum alloy developed by NASA. Engineered to maintain its high tensile strength up to 700°F(370°C), 50% higher than a conventional cast piston. This gives Hyperdryve pistons the strength to perform under operating conditions normally reserved for forged pistons. Hyperdryve piston kits come complete with piston, rings, circlips and wrist pin

① = CYLINDER SLEEVING OR REPLATING REQUIRED FOR OVERSIZES

② = CANNOT USE OEM RINGS

③ = NOT FOR OEM PISTONS

## VERTEX PISTON KITS

- All Vertex pistons are OEM replacements and include piston, rings, wrist pin and circlips
- All Vertex pistons have a Molybdenum Disulphide coating on the piston skirt which aides break-in and reduces wear
- 2 stroke pistons are cast from an aluminum alloy with 18% silicon content which decreases thermal expansion, provides better wear and prolongs piston life
- 4 stroke pistons are forged from 2618 aluminum alloy for strength and durability

# PISTONS

## VERTEX REPLACEMENT PISTONS FOR CYLINDER WORKS KITS

- Vertex pistons include piston, rings, wrist pin and circlips
- Vertex pistons have a Molybdenum Disulphide coating on the piston skirt which aides break-in and reduces wear
- 4 stroke pistons are forged from 2618 aluminum alloy for strength and durability
- *\*NOTE: Must add A, B, or C to piston part number listed to order replacement*
