

FORGED CLUTCH BASKETS, INNER HUBS AND PRESSURE PLATES

- Each basket, hub & plate starts as a dedicated precision forging
 - Raw forgings are then precision machined to very close tolerances
 - Relief cuts reduce rotational mass, increasing acceleration
 - Large oiling holes increase lubrication and reduce heat
 - Finished parts are hard-coat anodized for superb wear resistance
 - Teflon coating creates near-frictionless surface for clutch plates
 - **LIFETIME WARRANTY** for clutch baskets, inner hubs & pressure plates
- Covers breakage and notching for original purchaser with proof of purchase

CLUTCHES

CLUTCH PACK KITS

- Each kit has new friction plates, steel plates & clutch springs
- Manufactured to exact OEM tolerances, producing same feel
- Springs are 8-10% stiffer than stock ensuring a positive clutch lockup

PERFORMANCE CLUTCH KITS

- Includes Wiseco forged clutch basket w/ new cushions
- Each kit = new friction plates, steel plates and clutch springs
- Manufactured to OEM tolerances, producing OEM feel
- Springs are 8-10% stiffer than stock ensuring a positive clutch lockup

CLUTCHES FOR STREET MOTORCYCLES

"SRK" SERIES FULL KITS STREET / SPORT / RACE

Kit includes friction plates, steel separator plates and springs to provide a streetgoing kit for high performance street and road race use much similar to the DR program for off road. Some of the kits have diaphragm springs as used in many larger new bikes to provide a complete clutch rebuild kit.

"SR" SERIES KITS STREET / SPORT / RACE

A paper lined plate set complete with heavy duty clutch springs, the SR kit is ideal for heavy sport bikes, faster riders and production based race use. Advantages of the SR Kevlar series are longer life, higher heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series.

Note: Do not use fully synthetic oil

"CK" FRICTION PLATE KITS

Almost identical to original equipment clutch plates, the CK series are a cork based product impregnated with aluminum particles to increase wear life and heat resistance. Material is highly compressed to avoid swell and clutch drag and is an ideal general purpose replacement material for all grades and sizes of motorcycles. Kit includes a complete "engine-set" of friction plates only.

Note: Do not use fully synthetic oil

"CKF" CARBON FIBER FRICTION PLATE KITS

Carbon Fiber replacement friction clutch plate kit. These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

CLUTCHES FOR ATV's, OFFROAD & STREET MOTORCYCLES

"CS" CLUTCH SPRING SETS

Always fit new springs which get tired after miles of heat and use. EBC spring kits are 10%-15% stiffer than standard and are sold in engine sets. As stated in general fitting/safety instructions, advise customers that lever will feel slightly "heavier" when uprating springs, and to test ride/acquaint themselves with this change in control.

Note: Diaphragm type clutch springs not provided in all clutch kits.

CLUTCH REMOVAL TOOLS

A range of clutch tools to allow easy install of all EBC clutch kits. Range covers 95% of US market motorcycles and ATVs and allow positive holding of the clutch basket or center boss to allow untightening and retightening of securing nuts. Clutch application pages show appropriate tool for each model.

CLUTCHES FOR ATV's & OFFROAD MOTORCYCLES

"DR" COMPLETE KITS

Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.

Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevents premature driven plate wear, oil muddying and loss of stack height

EBC DR kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging". *Note: Do not use fully synthetic oil.*

"DRCF" CARBON FIBER KITS

The ultimate moto-x and ATV heavy duty clutch kit designed for race use. These new kits feature carbon fiber lined clutch plates plus a full set of steel plates and heavy duty springs. These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

"CK" FRICTION PLATE KITS

Cork based replacement clutch exactly the same as used on the street series CK clutch plates described above. A general all purpose replacement unit.

EBC only sells complete kits as replacing single plates is deemed unwise. The object is to reset the clutch to its original stack height and just replacing one plate will not achieve that and promote clutch slip.

Many off road clutches use aluminum separator plates which wear quickly and muddy the oil. If this has happened in your engine, flush the engine, change the oil and rebuild the clutch with a complete DR kit which includes STEEL separator plates that not only prevents wear but increases flywheel effect of the engine and improve performance.

"CKF" CARBON FIBER FRICTION PLATE KITS

Carbon Fiber replacement friction clutch plate kit. These kits are ideal for the higher torque generated in modern 4 stroke engines but are equally useful as a clutch upgrade in 2 stroke motorcycles.

EBC Clutches are TOTALLY ASBESTOS-FREE

Clutches are made from a cork based "anti-swell" facing impregnated with aluminum particles to reduce wear & heat fade

Kits are sold in pre-measured engine sets and should always be replaced in engine sets

USE ONLY MANUFACTURER'S drive case oils and avoid lead or other anti-friction additives

SOAK PLATES in drive case oil before installing

EBC Clutch Springs are 10-15% stiffer than stock springs to avoid slip

Always check lever operating pressure for ease of clutch disengagement before riding or releasing motorcycle for use.

CAUTION – SAFETY WARNINGS FOR CONSUMERS

Never start a motorcycle while in gear with clutch depressed

Never reverse a motorcycle with the engine running, the machine in gear and clutch depressed

Hold front brake lever on when selecting gears from standstill

Never engage gears from a standstill with engine revs above 1500 rpm

When fitting heavy duty clutch springs acquaint yourself with increased hand pressure required to depress clutch before riding motorcycle

We do not recommend the use of fully synthetic oils

Check oil levels regularly

What makes EBC the BEST!!!

Unique wide ear soft alloy drive body eliminates basket damage and delivers smooth clutch operation.
