

## UTVX ATV / QUAD ROTOR

- Heat treated and diamond ground to give superior braking performance
- Made from durable, German mill rolled stainless steel
- Front or rear fitments
- New lightweight construction
- Standard size OE diameter

## SXR UTV BRAKE PADS

- Race performance pad designed for the side-x-side / UTV market
- Premium blend of off-road race materials that delivers massive friction and heat stability
- Resistant to mud, sand and abrasion
- Sintered pads offer maximum grip and long wear life
- Made in the USA

### DIRT & ATV BRAKE PADS

#### X SERIES PAD

Cool running carbon based brake pad compound for sport use in moto-X and ATV applications. For mud, sand or wet conditions.

#### R SERIES PAD

A sintered copper material made in our own USA facility, the "R" series of heavy duty ATV and Moto-X pads have become an aftermarket standard offering high durability, complete resistance to mud, water, sand and grit etc, reduced rotor damage and long pad life.

#### MXS SERIES PAD

Ultra high friction, American made, sintered copper alloy pads with diamond ground surface finish for fast brake-in, these pads come complete with external hex drive slider pins and are suitable for all fast moto-X riding.

#### HH SERIES PAD

FA series, with HH suffix, denotes EBC's American made ultra high friction Double-H sintered copper alloy brake pads. Designed for maximum stopping power and lifetime. Fitted with stainless steel radiator plates for bikes without built in piston insulators to reduce heat transfer into hydraulics. New double compact vented technology for wider pads, reducing backplate bending.

Double segment contact improves venting and reduces backplate distortion

Unique to EBC - perforated stainless steel heat radiator plates

#### SV SERIES PAD

High density sintered copper alloy for longest possible life in utility applications on ATV, especially in wet, mud, dust and dirt conditions.

## DIRT & ATV BRAKE ROTORS

### CX EXTREME ROTOR

- Front or rear fitments
- New lightweight construction
- Radical new profile with V design
- Heat treated stainless steel
- Zinc coat rust prevention
- Standard size OE diameter

### MD SERIES STAINLESS ROTORS

Made from mill hard rolled steel, these rotors are machined to match the original units, mechanically de-stressed to avoid rotor distortion, surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting. Available in full circle or contour design.

### STREET ROTORS

#### X / XC SERIES ROTOR

Stainless steel rotor blades, ultra light 6 button construction and new SD system square drive technology. These rotors can be used for both road race or street use. These units are riveted together and are no longer rebuildable due to the infinite service life obtained with the SD square drive button system.

Available in full circle or contour design.  
Front applications only.

#### MD SERIES STAINLESS ROTORS

Made from mill hard rolled steel, these rotors are machined to match the original units, mechanically de-stressed to avoid rotor distortion, surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting.

Available in full circle or contour design.

## STREET BRAKE PADS

### FA SERIES PAD

FA series Kevlar organic pads provide fingertip stopping power and are the preferred choice for many sportbike and touring bike riders, having low disc attack characteristics and medium lifetime.

Unique to EBC - perforated stainless steel heat radiator plates

Double segment compact improves venting and reduces backplate distortion

### HH SERIES PAD

FA series, with HH suffix, denotes EBC's American made ultra high friction Double-H sintered copper alloy brake pads. Designed for maximum stopping power and lifetime. Fitted with stainless steel radiator plates for bikes without built in piston insulators to reduce heat transfer into hydraulics. New double compact vented technology for wider pads, reducing backplate bending.

### V SERIES PAD

These pads have semi-sintered compound which provides longer life, lower heat transfer and less rotor abrasion. Available for cruisers, big twins and some sportbike rear applications.

### SFA SCOOTER HH SERIES PAD

These American-made sintered scooter pads are long lasting with high performance HH rated stopping power for perfect braking wet or dry. HH pads are best suited for faster and heavier scooters and work well with stainless steel brake discs.

### SFA SCOOTER PAD

General replacement pad for urban use on scooter mopeds, moficks and mopeds. Made using aramid fibers, these pads give above average lifetime, reduced rotor wear characteristics and offer great value.
