

RUBBER CUSHIONED COUNTER SHAFT SPROCKETS

- Rubber cushioned sprockets have been widely used by OEM Japanese motorcycle manufacturers since the early 1990's to dampen the chain impact on the teeth of the front sprocket
- Same OEM proven technology, quality and design
- See Southern catalog volume #49, pages 722-746 for application information

JT SPROCKETS

RACELITE 7075-T6 ALUMINUM REAR SPROCKETS

- Machined from certified 7075-T6 Ergal aviation grade aluminum alloy
- Designed and engineered to withstand extreme pro-race conditions
- Provides maximum strength and durability at minimum weight
- Hard wearing anodized finish in black, blue, orange and red colors
- See Southern catalog volume #49, pages 722-746 for application information

SELF-CLEANING LIGHTWEIGHT STEEL REAR SPROCKETS

A NEW REVOLUTIONARY STEEL OFF ROAD SPROCKET

- New SC rear sprocket design available for selected applications in which the outer edge (just past the sprocket mounting bolt holes) is thinner to reduce overall sprocket weight (about one-third lighter than the normal steel sprocket)
 - Unique self-cleaning design that keeps the contact area clean from dirt and mud, greatly extends chain life
 - Heat-induction hardened C45 steel lasts up to six times longer than a 7075 aluminum sprocket
 - This sprocket is an improved design steel sprocket up-grade to the standard steel sprocket at the same price
- See Southern catalog volume #49, pages 722-746 for application information

JT SPROCKETS

TWINSTAR STEEL/ALUMINUM HYBRID SPROCKETS

OUTER RING - HEAT-INDUCTION HARDENED HIGH CARBON STEEL

- Advanced tempering process achieves hardness that could last six times longer than a 7075-T6 aluminum sprocket

CORE - LIGHTWEIGHT AVIATION GRADE ERGAL 7075-T6 ALUMINUM

- Precision made using laser cutting and CNC equipment
- Ultra lightweight race proven design
- See Southern catalog volume #49, pages 722-746 for application information

- JT Sprockets is the world's number one aftermarket sprocket manufacturer. All 7075 T6 Aluminum Alloy Competition sprockets are computer designed to combine the ultimate strength at minimum weight and they are CNC machined to aviation tolerances.
- All competition sprockets - marked as SC sprockets - come with meniscus shape self-cleaning grooves on all the teeth on both sides. The sprockets are sand blasted to reduce material surface tension and then finished by anodizing to a superb satin-silk effect.
- Steel front sprockets: Made of Japanese SCM415 chromoly
- Steel rear sprockets: Made of Japanese C49 steel
- Front sprockets available with RB rubber bushings for selected applications.
- (ALUM) Alloy rear sprockets available:
Made of Austrian 7075 T6 aluminum
